

The PHP Framework **for** **Web Artisans**

Laravel is a web application framework with expressive, elegant syntax. We've already laid the foundation — freeing you to create without sweating the small things.

[GET STARTED](#)[WATCH LARACASTS](#)

ooo

```
1  <?php
2
3  Route::get('/users/{user}', function (User $user) {
4      return $user;
5  });
6
7
8  Route::post('/users', function (CreateUserRequest $request) {
9      $user = User::create($request->validated());
10
11      Mail::to($user->email)->send(new WelcomeMessage);
12
13      return $user;
14  });
```

Write code for the joy of it.

Laravel values beauty. We love clean code just as much as you do. Simple, elegant syntax puts amazing functionality at your fingertips. Every feature has been thoughtfully considered to provide a wonderful developer experience.

START LEARNING

One Framework, Many Flavors

Build robust, full-stack applications in PHP using Laravel and [Livewire](#). Love JavaScript? Build a monolithic React or Vue driven frontend by pairing Laravel with [Inertia](#).

Or, let Laravel serve as a robust backend API for your Next.js application, mobile application, or other frontend. Either way, our starter kits will have you productive in minutes.

Everything you need to be amazing.

Out of the box, Laravel has elegant solutions for the common features needed by all modern web applications. It's time to start building amazing applications and stop wasting time searching for packages and reinventing the wheel.

Authentication

Authorization

Eloquent ORM

Database Migrations

Authentication

Authenticating users is as simple as adding an authentication middleware to your Laravel route definition:

```
Route::get('/profile', ProfileController::class)
    ->middleware('auth');
```

Once the user is authenticated, you can access the authenticated user via the Auth facade:

```
use Illuminate\Support\Facades\Auth;
```

```
// Get the currently authenticated user...
```

```
$user = Auth::user();
```

Of course, you may define your own authentication middleware, allowing you to customize the authentication process.

For more information on Laravel's authentication features, check out the [authentication documentation](#).

We've just scratched the surface. Laravel has you covered for everything you will need to build a web application, including email verification, rate limiting, and custom console commands. Check out the [Laravel documentation](#) to keep learning.

o o o

```
laravel-app % artisan test
```

```
PASS Tests/Feature/ToDoTest
```

```
✓ task can be added  
✓ task can be completed  
✓ task can be deleted
```

```
Test 3 passed
```

```
Time 0.41s
```

Move fast... with confidence.

Laravel is committed to delivering the best testing experience you can imagine. No more brittle tests that are a nightmare to

maintain. Beautiful testing APIs, database seeding, and painless browser testing let you ship with confidence.

[LEARN MORE](#)

Enterprise scale without the enterprise complexity.

Our vast library of meticulously maintained packages means you're ready for anything. Let [Laravel Octane](#) supercharge your application's performance, and experience infinite scale on [Laravel Vapor](#), our serverless deployment platform powered by AWS Lambda.

Forge

Server management doesn't have to be a nightmare. Provision and deploy unlimited PHP applications on DigitalOcean, Linode, Vultr, Amazon, Hetzner and more.

Vapor

Laravel Vapor is a serverless deployment platform for Laravel, powered by AWS. Launch your Laravel infrastructure on Vapor and fall in love with the scalable simplicity of serverless.

Breeze

Lightweight starter kit scaffolding for new applications with Blade or Inertia.

Cashier

Take the pain out of managing subscriptions on Stripe or Paddle.

Dusk

Automated browser testing to ship your application with confidence.

Echo

Listen for WebSocket events broadcast by your Laravel application.

Envoyer

Deploy your Laravel applications to customers with zero downtime.

Herd

The fastest Laravel local dev environment - now for macOS and Windows.

Horizon

Beautiful UI for monitoring your Redis driven Laravel queues.

Inertia

Create modern single-page React and Vue apps using classic server-side routing.

Jetstream

Robust starter kit including authentication and team management.

Livewire

Build reactive, dynamic applications using Laravel and Blade.

Nova

Thoughtfully designed administration panel for your Laravel applications.

Octane

Supercharge your application's performance by keeping it in memory.

Pennant

A simple, lightweight library for managing feature flags.

Pint

Opinionated PHP code style fixer for minimalists.

Prompts

Beautiful and user-friendly forms for command-line applications.

Pulse

At-a-glance insights into your application's performance and usage.

Reverb

Blazing fast and scalable WebSockets for your application.

Sail

Hand-crafted Laravel local development experience using Docker.

Sanctum

API and mobile application authentication without wanting to pull your hair out.

Scout

Lightning fast full-text search for your application's Eloquent models.

Socialite

Social authentication via Facebook, Twitter, GitHub, LinkedIn, and more.

Spark

Launch your next business with our fully-featured, drop-in billing portal.

Telescope

Debug your application using our debugging and insight UI.

Loved by thousands of developers around the world.

"I've been using Laravel for nearly a decade and never been tempted to switch to anything else."

Adam Wathan
Creator of **Tailwind CSS**

"As an old school PHP developer, I have tried many frameworks; none has given me the development speed and enjoyment of use that I found with Laravel. It is a breath of fresh air in the PHP ecosystem, with a brilliant community around it."

Erika Heidi
Creator of **Minicli**

"Laravel takes the pain out of building modern, scalable web apps."

Aaron Francis
Creator of **Torchlight** and **Sidecar**

"Laravel is nothing short of a delight. It allows me to build any web-y thing I want in record speed with joy."

Caleb Porzio
Creator of **Livewire** and **Alpine.js**

"Laravel grew out to be an amazing innovative and active community. Laravel is so much more than just a PHP framework."

Bobby Bouwmann
Elite Developer at **Enrise**

"I found Laravel by chance, but I knew right away that I found my thing. The framework, the ecosystem and the community - it's the perfect package. I've worked on amazing projects and met incredible people; it's safe to say that Laravel changed my life."

Zuzana Kunckova
Full-Stack Developer

"Laravel and its ecosystem of tools help me build client projects faster, more secure, and higher quality than any other tools out there."

Jason Beggs
Owner of [Design to Tailwind](#)

"Laravel's best-in-class testing tools give me the peace of mind to ship robust apps quickly."

Michael Dyrinda
Laravel Artisan + Laracon AU Organizer

"I didn't fully appreciate Laravel's one-stop-shop, all-encompassing solution, until I tried (many) different ecosystems. Laravel is in a class of its own!"

Joseph Silber
Creator of [Bouncer](#)

"Laravel has been like rocket fuel for my career and business."

Chris Arter
Developer at [Bankrate](#)

"Laravel has helped me launch products quicker than any other solution, allowing me to get to market faster and faster as the community has evolved."

Steve McDougall
Creator of [Laravel Transporter](#)

"I've been using Laravel for over 10 years and I can't imagine using PHP without it."

Eric L. Barnes
Founder of [Laravel News](#)

"I've been using Laravel for every project over the past ten years in a time where a new framework launches every day. To this date, there's just nothing like it."

Philo Hermans
Founder of [Anystack](#)

"I've been enjoying Laravel's focus on pushing developer experience to the next level for many years. All pieces of the ecosystem are powerful, well designed, fun to work with, and have stellar documentation. The surrounding friendly and helpful community is a joy to be a part of."

Freek Van der Herten
Owner of [Spatie](#)

"Laravel is for developers who write code because they can rather than because they have to."

Luke Downing
Maker + Developer

“Laravel makes building web apps exciting! It has also helped me to become a better developer

Tony Lea
Founder of **DevDojo**

“The Laravel ecosystem has been integral to the success of our business. The framework allows us to move fast and ship regularly, and Laravel Vapor has allowed us to operate at an incredible scale with ease.”

Jack Ellis
Co-founder of **Fathom Analytics**

A community built for people like you.

Laravel is for everyone — whether you have been programming for 20 years or 20 minutes. It's for architecture astronauts and weekend hackers. For those with degrees and for those who dropped out to chase their dreams. Together, we create amazing things.
